

MRS. SHIMONI NISCHINT SHAH DATA MANAGEMENT

Shimoni has completed her Bachelors in Pharmaceutical Sciences from Mumbai University followed by a Masters in Public Health with a concentration in Epidemiology and Biostatistics from San Diego State University, CA, USA. She has worked extensively in biostatistics using data analysis tools like SAS, SPSS, CPro and Epi Info and is also familiar with CDARS, Oracle Clinical, Unix, Oracle AERS and ARGUS. Having diverse work experience in organizations like Pfizer Inc (SAS programmer), Kantar Healthcare (Epidemiologist – Research Associate) and Sciformix (Pharmacovigilance), she joined The Foundation for Medical Research in April 2011.

FMR was primarily involved with experimental research since its formation. However in recent years it has increasingly taken on field based research studies. It was this transition that generated the need and a role for data management. With a mandate of management of quantitative data generated in field based research project her role is also that of a central resource helping streamline the data management across all departments as well as assist other projects in the institute on quantitative data/public health related queries whenever required. Since joining the institute she has 1 publication in a peer reviewed journal with one under process along with policy briefs and abstracts.

Other than data analysis she is also involved as a volunteer focusing on educating underprivileged children. Her other hobbies include reading and travelling.
