OCTOBER 26 & 27, 2024 NIMHANS CONVENTION CENTRE, BENGALURU

KYC - Know Your Case - Application of Sociocultural framework (SCF) for understanding and formulating mental health 'case' and care

Join an interactive workshop and co-learn how to -

1. Understand how socio-cultural contexts influence diagnosis and treatment of mental health situations
2. Formulate a mental health case by combining diagnostic and socio-cultural dimensions
3. Apply SCF through group activities and identify potential benefits and challenges in the process

In order to make better decisions by reducing patient-provider gap and seeking active participation from patients and relatives

Audience

Psychiatrists, primary healthcare workers including clinicians, psychologists, counsellors, social workers, and researchers working in the field of mental health **who believe that mental healthcare is *NOT* restricted to medicines**

Duration- 1 hour 30 min
